Location Intro

Headline:

Need a chartered helicopter in Killeen? You just found the best in Texas!

Body:

Flydar.com helicopter charters are available in Killeen, Texas and provide a wide variety of solutions. Our professional pilots can provide rides and tours, aerial filming and photography, land and animal surveys, heavy lifting and transportation, agricultural charters and simply to provide timely transportation for a busy executive.

Killeen is located in Central Texas about midway between Dallas and San Antonio. The population of Killeen during 2016 was about 140,000. Fort Hood, an Army basic training center is located immediately north of the city but Killeen is generally known as "the home of Fort Hood.". Consequently the financial wealth of the city is very much dependent on the base. During times of war, the economy of the City of Killeen and the surrounding area does very well. And when a war ends, the economy shrivels.

Flydar.com Killeen helicopter charters can accommodate your needs in the air. Call 800-555-5555 so we can answer your questions.

Important Content Jumps:

1. Headline:
Flydar Killeen Helicopter Charters Can Solve Many Problems
2. Executive Transportation
When an overly scheduled executive lacks time, or a very important client needs a timely lift or if anyone just wants to make a grand appearance, Flydar.com Killeen Helicopter Charters can make it happen. Highly trained, experienced pilots and the perfect equipment are waiting to fill your needs.

3. Heavy Lifting Helicopter Charters

When a heavy piece of equipment needs to be lifted and placed precisely, Flydar Killeen Helicopter Charters and our network of affiliated helicopter transport companies can provide aircraft capable of lifting and transporting up to 40,000 pounds. These are special helicopters designed specifically for hoisting heavy weights to a specific place. Call and ask for details.

4. Tours and Sightseeing

A helicopter tour is an excellent gift for family or friends. Or a tour can be part of a family or group celebration. Flydar.com Killeen prepackaged tours will include showing various training fields at Fort Hood, city parks and local attractions, beautiful vacation destinations plus absorbing the beauty of the green hills of Central Texas.

5. Aerial Photography and Filming

Photography from the air defines and clarifies the topography, residential configurations and city street alignment. Various purposes are satisfied by photographing or filming from above. Our experts at Flydar Killeen Helicopter Charters can assist in first determining your specific needs then chartering the ideal aircraft and pilot for the job.

6. Land and Animal Surveys

Land usage and accurately enumerating domesticated or wild animals can be done far more easily and expeditiously than if one were on the ground. Flydar.com Killeen Helicopter Charters can arrange the ideal aircraft and experienced pilot to assist in completing your task expeditiously. Call to speak to us now!

7. Agricultural Charters

Spraying fertilizer, pesticides, fungicides or whatever needs to be applied to your crops is another purpose Flydar.com Killeen Helicopter Charters can fill with the proper aircraft and experienced pilot. Agricultural maintenance is an important task appreciated and fulfilled by farmers. Call us today to charter our capabilities now!

Main Body of Content

1. Introduction to Helicopter Charters

Headline:

Flydar.com Killeen Helicopter Charters Offer a Variety of Services

Body:

We provide fully customizable services at Flydar.com Killeen Helicopter Charters. Through our network of affiliated helicopter charter services we can offer all types of non-fixed wing aircraft and very experienced, FAA certified pilots. We can fit your specific requirements in a highly professional manner with an emphasis on strict safety procedures and comfort with a bent towards luxury for our passengers.

Helicopter charters can fly to remote locations or deep into a city environment and land in any helipad, in a parking lot, on private property or anywhere there is space to safely set down. That capacity makes them highly flexible aircraft which can travel to any remote, crowded or otherwise difficult to reach location.

Helicopter charters through Flydar.com Killeen can also provide special helicopters designed to lift heavy weights. These aircraft are commonly used in construction or installations to place equipment at high levels.

Helicopter charters can also be used to assist in emergency situations, photography or filming, as well in many aspects of agriculture and, of course, helicopter charters make the most comfortable sightseeing trip.

Our friendly and knowledgeable helicopter charter experts are available from 9 am to 1 am seven days a week to answer any of your questions and charter your next flight.

Part 2 Executive Helicopter Charters

Title:

The Most Luxurious Way to Travel Anywhere!

Body:

Flydar.com Killeen helicopter charters can provide secure transportation to locations not offered by fixed wing aircraft. Helicopters provide discrete, secure point to point transportation for up to 16 people and can land in remote or crowded environments, comfortably transporting people to a specific location. Helicopter cabins are designed for maximum safety and ultimate luxury, frequently with club seating.

Helicopters are capable of landing in remote areas or city centers, at helipads, parking lots, on private property or anywhere that is flat and clear enough to set down. The versatility means that a helicopter can be used for business or pleasure, whenever adaptable transportation is desired or required.

Helicopter chartered transportation is ideal for transferring from airport to ski resorts, or into events that attract large crowds like concerts and sports stadiums or simply when one wishes to arrive conveniently closer to an ultimate destination.

The flexibility of making your own schedule is many times beneficial and sometimes quite essential. Flydar.com Killeen's associated helicopter charter services are ready to schedule 24 hour service virtually from anywhere to anywhere.

Do you need to take a quick trip across town and your schedule is tighter than driving or riding in a car will allow? Do you need to fly to Dallas on short notice? How about San Antonio, maybe Houston, or even New Orleans? We can arrange point to point, secure and discrete transportation when you want to, not when you have to!

If security is an issue, our staff and crew will happily work with your security provider to make your trip as risk free and as luxuriously comfortable as possible. And if time is an issue, we can generally have a helicopter ready to fly within two hours.

Call our friendly and informative staff at Flydar.com Killeen helicopter charters from 9 am till 1am seven days a week. They are quite knowledgeable about the capabilities of helicopter charters and can help schedule your next trip.

Part 3: Helicopter Lifts

1. Intro to Helicopter Lifts

Title:

Helicopters are Aerial Cranes

Body:

It could be said that conflicts (wars) never lead to good things but wars have lead to terrific breakthroughs in medicine and technology. In the 1950's during the Cold War, it was determined that the

military needed a helicopter capable of airlifting combat material such as artillery pieces, tractors, heavy trucks and tanks. The technology has advanced over the years and there are now helicopters capable of lifting up to 40,000 lbs of material. The civilian uses of such hefty helicopters include but are not limited to placing heavy construction equipment and supplies at the tops of tall buildings and transporting or removing many types of heavy or damaged equipment in or out of rugged, inaccessible terrain.

Flydar.com Killeen helicopter charters and their affiliated partners offer the widest selection of “sky cranes” in Central Texas. These behemoth helicopters are operated by FAA certified pilots with extensive experience and training.

2. Lifting Helicopters Weights and Types

Title:

Aircraft Types and Capacities

Body:

One of the most popular weight lifting helicopters is the Boeing CH-47, Chinook. In August, 1962 the first CH-47A entered service with a gross weight of 33,000 lbs. With improvements and upgrades, the current CH-47D has a maximum takeoff weight of 50,000 lbs.

The Chinook has a triple hook system which provides stability to large external loads at speeds as great as 160 mph. Commercial uses for the craft include medical evacuation, disaster relief, search and rescue, aircraft recovery, fire fighting, parachute drops, heavy construction and civil development.

The Mi-26 is the most powerful rotorcraft ever to have gone into production. It is still in production and has been in service since 1983. It has a maximum takeoff weight of 123,500 lbs and has the capacity to transport 44,000 lbs of materials for distances up to 500 miles without refueling.

Whatever capacity weight lifting air crane you may need, Flydar.com Killeen helicopter charters, through our network of affiliated helicopter charter services, can provide the precisely correct piece of equipment you require, manned by a FAA certified, extensively trained and very experienced crew.

Call our knowledgeable and friendly agents at 800-555-5555 to discuss your needs and charter the best.

3. Benefits of Helicopter Lifts

Aerial cranes or “sky cranes” are helicopters designed to lift large loads. Helicopter cranes are able to travel to and lift in areas that are difficult to reach by conventional cranes. They are also usually cost effective compared to ground-based cranes. Transportation and setup times are reduced for helicopter cranes, this is an advantage for high-traffic areas where roads or major thoroughfares would need to be closed for extended periods of time. Helicopters can lift loads to high altitudes, for example, to the top of tall buildings or mountains.

Helicopter cranes are most commonly used to lift units/loads onto shopping centers and high-rises. They can lift anything within their lifting capacity, (cars, boats, swimming pools, etc.). They also perform disaster relief after natural disasters for clean-up, and during wild-fires they are able to carry huge buckets of water to extinguish fires.

Helicopter crane precision lifting also allows for very accurate positioning of loads into the most difficult places.

The helicopter as a high powered lift vehicle has proven invaluable in the construction industry for various applications and in industries, such as mining services, oil and gas exploration, transmission tower construction and repair, HVAC and generator installation, helicopter concrete pouring, spa and pool lifting, and heavy equipment lifting across marine or the most difficult terrain.

Flydar.com Killeen helicopter charters and our affiliated leasing companies priority is safety for your helicopter lift job. We conduct a safety review to identify hazards or risks involved to improve safety and comply with all government regulatory requirements.

Contact our staff 9 am to 1 pm weekdays at 800-555-5555 to discuss and arrange your helicopter lifting requirements.

4. Benefit and Call to Action:

Call 800-555-5555 to plan you helicopter lifting, today!

Part 4: Helicopter Tours

Title:

You See a Lot on a Helicopter Tour!

Body:

A helicopter chartered tour is an excellent gift for family or friends. Or a tour can be part of a family or group celebration. Flydar.com Killeen prepackaged tours will include an in depth exploration of the multiple terrain features and the various building types and city configurations used to train infantry at Fort Hood.

On the agenda is to pass over Condor Park and Long Branch Park, the two major parks in town that attract people year round. The tour will take note of Great Escape of Central Texas in Killeen. It is an unusual, very popular, amusement attraction with multiple rooms in which small groups of people at a time are challenged to solve perplexing puzzles and play unusual games.

And any helicopter tour of the surrounding area will include flying to Stillhouse Hollow Lake. Originally built by the Army Corp of Engineers for a secure water supply for Fort Hood, the lake also provides flood risk management for the entire region, supplies water for a large area and offers recreational activities like some of the best fishing, camping and boating in Central Texas.

Many people find it most attractive to take the helicopter tour around sunset to watch the sun set over the rolling, green hills of Central Texas. But customers can ask for flights at any time of the day. Although the tours are generally preplanned they can be customized for an additional price, whether to add passengers or adding time. Vice versa customers can choose a shorter tour to fit their budget.

Call 800-555-5555 and talk to our representatives to plan your helicopter chartered tour.

Benefit and Call to Action:

Helicopter tours provide eye-catching views from above – don't miss it, call today!

Part 5: Aerial Filming and Photography

Title:

Filming and Photography by Helicopter!

Body:

In this age of drone photography, filming and photographing from a helicopter has distinct advantages. In helicopters there is the ability to mount large, very heavy film cameras and use lenses and 35 mm or larger format film cameras that if mounted on a drone, the drone might be larger than a helicopter. And such an aircraft would certainly cost more per minute of flight time than a helicopter.

But even for digital camera owners, helicopters can fly much higher, move faster and move more precisely and ultimately more smoothly. Drones only fly up to 400 feet from the ground and the cameras which come as part of drones, are only of mediocre quality. If you are serious about photography, a helicopter cannot be beaten

Flydar.com Killen helicopter charters can optionally arrange to have the doors removed to make shooting and filming easier. Of course there are harnesses so you won't fall out. And with our affiliated charter

service centers, we have several different helicopters available for different capacities. Several photography enthusiasts can share the costs of a helicopter flight and there is no minimum time required.

Flydar.com Killeen can assist in planning and tailor the flight path to ensure the best shots, plus flights can be scheduled any time of the day or night, weather permitting.

Benefit & Call to Action:

Call 800-555-5555 to have the photographic time of your life!

Part 6: Agricultural Charters

Title:

Aerial Agricultural Applications

Body:

Helicopters can assist farmers and farming organizations year round by applying fertilizers, fungicides, pesticides and other chemicals over plowed fields or growing crops to help them grow more efficiently and boost production. Flydar.com Killeen through our affiliated dealers contracts with experienced crop pilots with the exact right equipment to accomplish your application.

Helicopters do many tasks and although they may not be the only way of completing the same tasks, helicopters are usually the best way of accomplishing it. Helicopters can serve well in applying mosquito and pest control and also applying herbicides for noxious weed and brush control.

What began decades ago using whatever aircraft and equipment were at hand has evolved into a highly specialized sector of the aviation industry. The agricultural aerial application industry today relies on advanced technology and a skilled, professional workforce.

Agricultural pilots are true partners in modern agriculture, which is primarily about yield: maximizing the amount of crops that can be grown and harvested from a plot of land. The pilot's specific role here is to help the farmer achieve those high yields while also aiding profitability and sustainability by protecting crops from insects, diseases and other pests.

Flydar.com Killeen helicopter charters is the best source of aerial agricultural service in Central Texas. Call 800-555-5555 to investigate our capabilities and then become one of our cherished customers.

Benefit and call to action:

For Any Agricultural Aerial Application Contact the Best!

Part 7: Heli-logging

Title:

Logging by Helicopter is the Safest Way!

Body:

Heli-Logging, also known as standing stem harvesting utilizes helicopters to harvest lumber by attaching cables to a tree and lifting it out of the forest. The process is to first survey the forest, choosing trees based on economic demand and the limitations of the helicopter. Trees are marked and climbed to remove the limbs and top off the tree. Trees are then partially cut at the stem. Chains are attached to the tree and the stem is then pulled upwards by the helicopter until the stem snaps off at the partial cut.

The cut trees are then transported by the helicopter to awaiting trucks or dropped in water to be retrieved later. Not all helicopters are capable of lifting trees in this manner. Preferred helicopters are the 9000hp Sikorsky S-64F, the 3900hp MIL 8, and the 4400hp KAMOV Ka-32.

Heli-logging poses less risk of injury to personnel and structures from falling trees and is far more efficient than traditional harvesting methods. A great advantage is that heli-logging works much better than standard methods in rocky or steep terrain. Trees harvested in the traditional manner fall and are many times damaged by falling on rocky ground.

Flydar.com Killeen helicopter charters through our affiliated helicopter leasing firms can provide helicopters and loggers to harvest lumber whenever necessary. Call 800-555-5555 and talk to our experts to arrange and charter the tree transporting helicopters and pilots.

Benefit & Call to Action:

Find More Details and Charter Lumber Harvesters Today!

Part 8: Game Day Services

Title:

Arrive at a Sporting Event in Style!

Body:

The ultimate in security, comfort and prestige is arriving to a sporting event by helicopter. Going to a Cowboys game at AT&T Stadium? Would you like to fly into the parking lot of American Airlines Center to go to see a Mavericks game? Or how about fly over then land in the parking lot of a Rangers baseball game? There is a great deal of traffic arriving at the Nascar races at Texas Motor Raceway and at several PGA events which happen every year around Texas. Arriving by helicopter avoids the traffic jams.

Flydar.com Killeen helicopter charters will work with your security provider to assure that your day at the game is a day of pleasure.

The interiors of our cabins are pure luxury with the finest of accoutrements (many times club seating). And there is no entrance more celebrated than arriving anywhere in a helicopter.

We organize everything for you as far as permits, securing the landing site and working with the event staff to assure everything happens as planned.

Benefit and Call to Action:

Call 800-555-5555 today before the best seats are taken!

Part 9: Aerial Relief Support

Title:

Disaster Relief Support

Body:

Flydar.com Killeen helicopter charters is your best choice for disaster relief support helicopters. No one is better at aerial firefighting, clean-up operations, transporting mobile hospitals and supplies, removing wreckage and recovery projects. We are the best because among our network of affiliated helicopter leasing companies we can summon the individually perfect rotorcraft and pilot for a specific incident or, in times of need numerous aircraft with FAA certified pilots who have many years of experience and training.

There are many emergency situations in which a helicopter is, maybe not the only method, but certainly the best way to do it. Situations like removing car wrecks from a body of water or a deep ravine and salvaging a small boat or flying accidents and even some types of deep water salvage operations are examples when helicopters are ideal.

Flydar.com Killeen helicopter charters can expeditiously summon the right helicopter with the right tools and the right crew and potentially within two hours. Our phones are answered between 9am until 1am the next morning, seven days a week.

Benefit & Call to Action:

At the time of an emergency call us at 800-555-5555!

Part 10: Cargo & Freight Delivery

Title:

Delivery by air is the Fastest Way Possible!

Body:

Through our affiliated helicopter chartering services Flydar's Chartered Freight Services can deliver any kind of cargo to virtually anywhere on earth. For a business or for an individual for whatever reason, if cargo, large or small needs to be delivered somewhere, we can do it on time and intact. We have small aircraft available with which a small package or box can be picked up anywhere, potentially within a two hour window, and flown to anywhere on the face of the earth. Or we have massive weight hoisting helicopters that can handle up to 40,000 pounds of material and travel 500 miles without refueling.

Through our network of service providers there is no limit and nowhere on earth that your freight cannot be delivered. Our team of logistics experts are available 9am till 1am the next morning, seven days a week to apply their expertise in the freight transfer industry to make your shipment arrive where intended. You will be briefed on how long it will take for your freight to be processed and how long it will take in transit. In general, we can have an aircraft available within two hours of your call for a pick-up and we understand clearly that the reason one chooses to ship cargo by air is time.

Call us today at 800-555-5555 to start your shipment on its way.

Benefit & Call to Action:

When it really needs to be there, Call Flydar today!

Part 11: Wildlife & Land Surveys

Title:

Wildlife Surveys are Easier From the Air

Body of Wild Animal Survey:

Helicopter surveys of wild animals, deer most often, are far easier than attempting a count from ground level. The reason for the surveys is to insure that wildlife is healthy but most significantly to determine the numbers of deer per acre and thereby set the length of deer season for the year.

Flown in quadrants helicopter deer surveys are taken at a 50 ft elevation with GPS coordination to ensure the best overall coverage of the property being surveyed. Surveys seek to count the buck to doe ratio, the fawn survival rate, antler developments of bucks and determine if the food available is sufficient to support the overall deer population.

Under the right circumstances it might also be helpful to survey predators, exotics like alligators and other animals and Flydar.com Killeen helicopter charters can suggest the right aircraft and pilot and charter the flight.

Benefit & Call to Action:

Call 800-555-5555 to arrange your survey today!

Aerial Land Survey Body:

Rotorcraft-based aerial land surveying is far more easy than surveying at ground level and is also highly superior to fixed wing aircraft. Helicopters can fly more slowly, resulting in more accurate photogrammetric measurements. Although FAA regulations require that fixed wing aircraft must stay at least 1000 feet above the highest obstacle, helicopters can fly lower and slower, even hovering to check details. Helicopters surveying can also achieve vertical accuracy of .05 feet.

Utilizing helicopters in densely populated, high-traffic areas to conduct surveys is safer and more accurate. Helicopter surveying reduces traffic congestion and injuries to field personnel and citizens. As an added benefit helicopter surveying can replace ground level survey of cross-sections in high-speed, traffic congested areas or at sites contaminated by toxic materials.

And helicopter surveying has been used for seismic readings, infrared Imaging, energy surveys (over the ocean and land), real estate development, construction and insurance accident analysis.

Contact the experts at Flydar.com Killeen helicopter charters to discuss details and schedule your survey.

Benefit & Call to Action:

Call 800-555-555 to charter your survey now!

Part 12: Emergency Services Immediate Availability

Title:

Quick Response Emergency Services

Body:

At Flydar.com Killeen Helicopter Charters, our agents are ready all day and most of the night to provide answers to questions and arrange for whatever air service you desire. Other helicopter charter services might take a day or more to arrange a flight and start flying. We can potentially organize a client's trip and be in the air within two hours notice. And emergency situations are staffed and flying as fast as humanly possible. Trust us at Flyar.com Killeen to satisfy your every need faster than anyone in the helicopter charter business, with the courtesy, charm and expertise you expect.

Benefit & Call to Action:

Call 800-555-5555 today to get started flying!
